Become a Successful Leader

By: Waqas Choudhry

take your first step towards leadership by creating a Vision Statement for your business

Are you a leader just because you run a small business? No. But you need to be. Without leadership, the ship that is your small business will aimlessly circle and eventually run out of power or run aground.

It's not having followers that define leadership. Cool-headed, farseeing, visionary, courageous – whichever adjectives you choose, leadership is a winning combination of personal traits and the ability to think and act as a leader, a person who directs the activities of others for the good of all. Anyone can be a leader, even if the only person they're leading is themselves.

But you can't become a leader just by saying you are. Leadership needs to be worked at. Transform yourself into a leader with these five keys of leadership.

1. A leader plans

The core of leadership is being proactive rather than reactive. Sure, leaders are good in crises – but that doesn't mean they sit around letting crises develop. Leadership involves identifying potential problems and solving them before they reach crisis proportions – and the ability to identify and reap potential wind-falls. So good leaders analyze and plan and adapt their plans to new circumstances and opportunities.

2. A leader has a vision

Vision is essential to good leadership. Vision provides direction and without direction, there's not much point to all that planning; your small business will still flail about. So if you don't have one already, take your first step

towards leadership by creating a Vision Statement for your business. Because it embodies your dreams and your passions, a vision statement will also serve as a leadership vision.

3. A leader shares her vision

Sharing your leadership vision helps your vision grows and your leadership develop. As you tell your leadership vision to others, you will strengthen your own belief in your vision and strengthen your determination to make your leadership vision become reality. And other people will start to see you as a person who's "going places". Your leadership skills will grow as you and other people recognize you as a person with leadership potential.

4. A leader takes charge

At this stage of leadership, you put together your planning and your leadership vision and take action. Whether it's implementing a specific plan to improve your business's bottom line or responding to a crisis, you, as the leader, are the one who makes the decisions and sees that the appropriate actions are carried out. You can't just "talk a good game" to be a leader; you need to act and to be seen as taking effective action for the good of your small business.

5. A leader inspires through example

If I asked you, you could easily name three people whose leadership qualities inspire you. If I asked you why, you'd tell me about the things these inspiring people did or are doing. Leadership is defined through action. Therefore, in developing your own leadership skills, you have to

act in ways that are fitting to your leadership vision and your self – all the time. We can all name many actions of other people whom we admire, but what inspires us is the integrity that gives these actions meaning.

Becoming a leader isn't easy because it takes a conscious commitment and consistent effort to develop one's leadership skills. But on the positive side, anyone who is willing to make the effort can become a good leader.

And as good leadership is critical to business success, your efforts to improve your leadership skills will be amply rewarded. By working on these five keys of leadership, you can become the leader your small business needs.
